## Export - Import - Internationalization

Warsaw, 26 May 2026

“Poland–Asia Business Forum. Export – Import – Internationalization” is a unique international event bringing together leaders of Polish exports, representatives of Asian business, and key investors interested in Central and Eastern Europe.

During the conference, participants will address the most important challenges and trends shaping the global economy—from geopolitical shifts and market transformations to new directions in the development of international trade.

The forum will also focus on logistics and supply-chain security, trade and financial risks, as well as the role of banks and insurance institutions in supporting foreign expansion. Experts will discuss the impact of EU and national regulations on investments in Poland, as well as the consequences of new sanctions regimes for exporters and importers.

Importantly, the event is also dedicated to leaders of foreign direct investment in Poland originating from Asia. We deeply value their trust in Poland and their decision to invest their capital in this region. Their long-term commitment, responsible business practices, and readiness to collaborate make them excellent partners for Polish companies. Their presence not only strengthens bilateral relations but also contributes to the dynamic development of key sectors of the Polish economy.

The forum is aimed at representatives of business, public administration, diplomacy, and political circles, with its overarching goal being to create a space for constructive dialogue.

It is a unique platform for exchanging knowledge and experience, identifying barriers and challenges, and jointly developing solutions that can genuinely strengthen economic cooperation between Poland and Asian countries.
